Project

All-in-One Smart Robo Car Using AI and UNO (The Islamia University of Bahawalpur)

Project Leader

2024-11-18 - 2025-04-21

The project aimed to design and develop a multi-functional smart robotic car capable of performing various autonomous and semi-autonomous tasks using Artificial Intelligence and microcontroller technology. The car was integrated with Arduino UNO and ESP32 Camera for processing, control, and real-time video transmission. Multiple sensors, including ultrasonic and IR sensors, were used to ensure intelligent decision-making and environmental interaction.

Certification

Certificate of Excellence From (Final Year Project)

- 2025-01-21

Awarded for outstanding performance in "All-in-One Smart Robo Car Using AI and UNO," recognizing innovation in robotics, automation, and AI integration.

Cyclic Competition From (Cyclic Academic Competition)

481 - 2020-01-01

Secured first place in a college-level sports competition, demonstrating teamwork, discipline, and competitive spirit.
